What is Minesweeper?

Minesweeper is a process-of-elimination puzzle featuring a grid with randomly-placed "mines" that you must identify. To this end, the numbers appearing on the grid may be used as clues for locating the mines. They're not yours, they're mines. Good luck!

How to Solve:

This version is played much like the PC app of the same name, except that where clicking the wrong grid square will end the game on the computer, you may feel free to mark these mines directly. We suggest placing a dot where there must be a mine, and marking an "X" where there can't be one.

1		3	
	•	•	•
	•	5	•

They may be rare, but large numbers leave little margin for error. Find them first to help with smaller surrounding clues.

•	•		1
3	4	2	
•	2		
		1	

Sometimes a clue will be surrounded by a number of possible mines equal to itself, as with the 3 on the left.

	•	X	X
2		X	X
		•	X
1			X

Empty squares are guaranteed Xs when they're surrounded by mines &/or other empty squares. Mark them quickly and move on.

•	•		
2	X	1	
X	0	X	
X	X	X	

Occasionally, a zero may appear in your starting clues. Even with other clues nearby, zeroes make for some easy eliminations.
