A sudoku is a number-placement puzzle consisting of 81 squares arranged in a 9x9 grid that's further divided into nine 3x3 sections. The puzzle is solved when each row, column, and section contains exactly

1	8	3	5	2				
4	7	2	5		9	3	1	6
3	5						2	4
7	2						6	8
6	1	5	9		2			
9		4		6		2		1

1		8		3		5		2
4	7	2	5		9	3	1	6
3	5						2	4
7	2						6	8
6	1	5	9		2			
9		4		6		2		1

one of each of the single digits 1 through 9. For example, in order to fill the top-left square, we need to consider the row, column, and

1	8		3		5		2	
4	7	2	5		9	3	1	6
3	5						2	4
7	2						6	8
6	1	5	9		2			
9		4		6		2		1

5								
1		8		3		5		2
4	7	2	5		9	3	1	6
3	5						2	4
7	2						6	8
6	1	5	9		2			
9		4		6		2		1

section containing it. Its row contains no clues, but its column is only missing 2, 5, and 8. Taking a look at the upper-left section, we see that 2 and 8 are already present, so the only option is 5. Good luck!
